

APPLICATION NOTE**M9000 Applications
Inlet Vane**

This application for the M9000 Family of Electric Motor Actuators provides control for inlet vanes. It can be used with proportional or on-off/floating controllers providing the proper positioning for the vanes. Obtain the system diagrams for controller installation to verify proper terminals for each actuator.

**Figure 1: Inlet Vane Control****Figure 2: Using Current Controller with Feedback**

Note: DX-9100 and A350 controllers can only drive one actuator in the current mode.
